

## ULSTER COUNTY 2020 CAMPGROUND PERMIT CONDITIONS

Effective 5/1/2020 Until Further Notice

**These rules MUST be conspicuously posted on the property as well as on the website run by the facility**

Only cabins/bungalows with their own bathroom and cooking facilities, and RV sites with water, electric and sewage hookups, may be rented and used, and only to individuals or families already isolating as a unit. All guests must provide their own bed linens and towels.

Tent sites without individual bathing and cooking facilities will not be permitted.

There shall be a delineated and marked plot of land around each RV spot and/or cabin/bungalow for guests to safely and adequately set up barbeques (if allowed) and outdoor seating areas, and there must be at least six feet between any two delineated plots. This may require a facility to limit the number of cabins or RV parking spaces occupied in order to facilitate such required spacing.

There shall be a minimum 72 hours between a check out and the next check in for any cabin or bungalow rental during which time a full sanitizing of the rental unit shall be performed using virus-killing disinfectants.

All guests shall have no symptoms of illness upon arrival and will have their temperature taken. Any guest with a "touchless" thermometer reading of 100.4 degrees or above shall not be allowed to stay. Any cancellations due to illness or elevated temperature shall include a refund to the renter as stipulated in the rental contract.

All guests, at all times, will wear face covering masks when not inside their RV or cabin/bungalow and shall maintain at least a six feet distance from others on the campground.

Common showers will not be made available.

All toilet facilities will be sanitized with disinfectants, listed by the EPA as effective against coronaviruses, at least three times daily.

Occupancy of toilet facilities shall include the wearing of a facial covering mask, as well as strict social distancing between users (no two adjoining toilet stalls, urinals or sinks may be used at once).

Any clubhouses, indoor amenity spaces, playgrounds, water park features, pools, pavilions, game courts, community rooms or dining facilities shall be closed for use.

No equipment or facilities will be made available for use or rental (such as kayaks and canoes, sport equipment, etc.) that cannot be safely and fully sanitized between uses.

Access to the campgrounds' property to the Department of Health and to any law enforcement entity with jurisdiction in the municipality shall not be impeded.

The campground operator must conform to all other rules and regulations of the New York State Sanitary Codes and the Ulster County Sanitary Codes.

This permit may be revoked at any time for cause.

  
Carol M. Smith, MD, MPH  
Commissioner of Health
